A young man in Fredericksburg took his girl out for a drive, and she fell out of the buggy and he drove on a mile or two before he missed her. You can bet your last penny that such a thing would never happen in Massillon. The harness might drop off, the shaft pull out, the horse drop dead, or the buggy wheels disappear entirely, and not be missed, but the girl—never.—Massillon Gleaner.

NATURE'S DANGER SIGNALS

Do your eyes blur at times? Do they hurt after reading? Are there frequent headaches? Are the muscles around the eyes drawing wrinkles and crows' feet. They're Nature's danger signals.

Only when sight is gone is the terrible danger realized. It costs so little to help the eyes, if done in time. We can give the early help—later we have to refer the work to oculists.

We examine the eyes in the most intelligent and careful manner without charge. If glasses are needed we can supply the correct lenses mounted in any manner desired.
